PROJECT FLOW

DATE	18 November 2022
TEAM ID	PNT2022TMID27345
PROJECT NAME	Fertilizer Recommendation for Plant Disease Prediction

Project Flow:

- Download the dataset.
- Classify the dataset into train and test sets.
- Add the neural network layers.
- Load the trained images and fit the model.
- Test the model.
- Save the model and its dependencies.
- Build a Web application using a flask that integrates with the model built.
